S I R :

IN THE CLAIMS:

Please substitute amended claim 4, and add new claim 12 as follows:

4. (amended) A telephone system as defined in claim 2, said second condition is defined by a term including the fact that any key other than said specific key is operated in the input key section under the off-hook state in said on-hook/off-hook operation section, wherein when detecting that said second condition is satisfied, said control section is operable for said switching section to connect said telephonic function section with said telephone network.

Please add the following new claim:

--12. (new) A telephone system as defined in claim 3, said second condition is defined by a term including the fact that any key other than said specific key is operated in the input key section under the off-hook state in said on-hook/off-hook operation section, wherein when detecting that said second condition is satisfied, said control section is operable for said switching section to connect said telephonic function section with said telephone network.--
